

QCredit Saves: Empowering Financial Futures

QCredit Saves is a comprehensive financial education program by FE4L, designed to empower high school and college students from marginalized communities with essential credit knowledge and skills. Through practical, real-world lessons on credit scores, debt management, and responsible financial habits, we provide young people with the tools they need to make informed decisions and build a foundation for lifelong financial security.

Our program aims to close the financial literacy gap by focusing on the unique challenges faced by underserved communities. QCredit Saves teaches students how to build and maintain good credit, equipping them for opportunities in homeownership, entrepreneurship, and economic independence. With an 8-week curriculum for high school students and a 4-week curriculum for college students, QCredit Saves is more than a class—it's a pathway to empowerment and a brighter financial future.
